Recording and Privacy Protocol

For the practitioner. How to protect families' information and recordings.

This protocol applies to every NBO visit under ConnectEd Kids Therapy Center. It supports the Data Privacy Act of 2012 (RA 10173). Privacy questions go to the Center's Data Privacy Officer (info.connectedkidsph@gmail.com).

1. Principles

- Collect only what is needed. Use the first initial and ages for anything that leaves the Center.
- Consent first, and separately: participation (Consent 1), recording and teaching use (Consent 2), examples, feedback, and promotion (Consent 3).
- Recording is never required to take part.
- Families may withdraw at any time and ask for deletion.

2. Before the visit

- ☐ Consent 1 signed and a copy given to the family.
- ☐ Recording choice recorded (Consent 2). If "No recording," do not set up any device.
- ☐ Use a dedicated device. Turn off cloud auto-upload and automatic photo backup.
- ☐ Confirm the framing the family chose (for example, baby and hands only).
- ☐ Tell the family how to ask you to pause or stop.

3. During the visit

- State aloud when recording starts and stops.
- Pause immediately if the family asks, or if the baby is upset and the family seems uneasy.
- Never record anyone who has not been covered by the consent. Ask visitors and siblings for permission or frame them out.
- Do not post, message, or share any clip, even to colleagues.

4. Right after the visit

1. Transfer the file the same day to [SECURE STORAGE]. Protect with a password or encryption.
2. Delete the file from the recording device and any trash or recently deleted folder.
3. Name files only by **first initial + date + visit code**. For example: `A_2026-11-12_V1`. Never use names.
4. Photograph the Parent Summary with only the first initial; the original stays with the family.
5. Log the file in the Tracker (16): where it is stored and the delete-by date.

5. Who may see recordings

Who	When
Practitioner	Always, for self-review
Certification mentor	Only if Consent 2 box B allows, for feedback
Trainings, courses, seminars, and mentorship at ConnectEd Kids Therapy Center, CORE, and SPACES	Only if Consent 2 box C allows, in a private setting (in person or live online); use clips, not full recordings; never as shareable files; follow the choice (recognizable or not)
Anyone else	Never

6. Retention and deletion

- Keep recordings and private records for [RETENTION PERIOD], then delete permanently and record the date.
- If a family withdraws, delete the recording and private records within [X] days, confirm to the family in writing, and ask the mentor and the Institute to remove any certification copies.
- Clips used in teaching must be deleted when consent is withdrawn.

7. Marketing and social media

- Check Consent 3 (B3) **before** using any photo or video of a family.
- If there is no clear yes, use illustrations or stock images.
- Never name a family, baby, or health detail. Never post results.
- If a family withdraws, remove their material from the Center's pages within [7] days.

8. If something goes wrong

- Lost or stolen device, wrong email, or shared file: tell the Data Privacy Officer **immediately**.
- Under the Data Privacy Act, some personal data breaches must be reported to the National Privacy Commission, generally within 72 hours of knowledge. The Data Privacy Officer decides, and the affected family is informed.
- Write down what happened, what data was involved, and what you did.

9. Incident log

Date	What happened	Who was told	Action taken

Retention periods, storage choices, and the breach-reporting steps should be confirmed with the Center's Data Privacy Officer.
